ONE IN A BILLION APPLICATIONS

Privacy Policy

Doublewise for iPad and Mac

Effective date: 4 November 2026

One In A Billion Applications (“we”, “us” or “our”) makes Doublewise (the “App”), an app for iPad and Mac that lines up vocal recordings with a lead vocal and lets you tune them. The Mac version includes an Audio Unit plug-in that runs inside music software such as Logic Pro.

This policy explains what the App does with your information.

> **In short**
>
> Doublewise does not collect, store or send any personal information. It has no account, does not connect to the internet, and keeps your recordings on your device.

1. Information we collect

Doublewise does not collect any personal information.

- **No personal details.** The App does not ask for your name, email address or any other details, and has no account or sign-in.
- **No analytics, advertising or tracking.** The App contains no analytics, crash-reporting or advertising software, and does not track you across other apps or websites.
- **No internet connection.** The App does not connect to the internet. Nothing you do in it is sent to us or to anyone else.
- **No permissions.** The App does not ask for access to your microphone, camera, location, contacts or photos.

2. Your audio and sessions

Doublewise works only with the audio you give it: files you open in the App and, on Mac, the audio your music software sends to the plug-in. All analysis, alignment and pitch editing happens on your device.

To do its job, the App keeps these files on your device:

- **Sessions and exported audio** that you save, either where you choose or, on iPad, in the App’s own folder, which you can see in the Files app.
- **Copies of the recordings in an open session,** kept in the App’s own storage so that the session stays playable.

- **Copies made when you drag** an aligned recording into another app on Mac.
- **The plug-in's captured audio** on Mac, kept in the plug-in's own storage so that your project can find it again when you reopen it. Your music software saves the plug-in's settings in your project.
- **Preferences,** such as how the App's views are set up.

We cannot see or reach any of these files. Deleting the App removes the files kept in its own storage. Files you saved or exported elsewhere stay where you put them.

3. Sharing

We do not sell, rent or share any information, because we do not collect any. When you choose to send a file from the App, for example with AirDrop, the Files app, iCloud Drive or the share sheet, it goes only where you send it, through Apple's services and under Apple's terms.

4. Apple and the App Store

You buy and download Doublewise from the App Store, which Apple runs under its own privacy policy. If you have chosen in your device's settings to share analytics with app developers, Apple may give us crash reports and statistics about how the App is used, such as how many times it is opened. Apple provides these in a form that does not identify you. They come from Apple, not from the App, and we use them only to fix problems and improve the App.

5. If you contact us

If you email us, we receive your email address and whatever you write. We use them only to reply and to help with your question, keep them only as long as we need to, and will delete them if you ask.

6. Your rights

Under UK and EU data protection law (the UK GDPR and the GDPR), you have the right to see, correct and delete personal information we hold about you. Because the App collects none, the only personal information we might hold is in emails you have sent us. To use these rights, email us at the address below. In the UK you can also complain to the Information Commissioner's Office at ico.org.uk.

7. Children

Doublewise collects no personal information from anyone, including children.

8. Security

Your recordings stay on your device, protected by its own security such as its passcode, unless you choose to send them somewhere else.

9. Changes to this policy

If we change this policy, we will publish the new version at oneinabillion.net with a new effective date.

10. Contact us

If you have any questions about this policy or the App, please contact us:
